Education

University of California, Irvine — Irvine, CA
Bachelor of Science in Computer Science (GPA: 3.499) — *September 2024 – June 2028*

Projects

J.I.T. | *Swift, Figma, React, Typescript* — April 2026

- Won Best Use of MongoDB Atlas Track at LA Hacks 2026
- Built an iOS AR app leveraging local AI and RAG Search to provide real-time, textbook-grounded study advice
- Rapidly iterated through multiple design stages within a 36-hour window with Figma mockups and wireframes
- Worked with the ZETIC Swift SDK and ZETIC Melange to run Qwen3 0.5B on-device for instantaneous inference
- Integrated REST connections to Redis, Cloudinary, and FastAPI to enable 3D asset delivery and RAG retrieval

MAGI | *React, Typescript, Tailwind, AWS Lambda, AWS Amplify, AWS Bedrock, DynamoDB* — April 2026

- Architected a trilateral multi-agent consensus system on AWS to increase accuracy in prompt resolution pipelines
- Orchestrated AWS Bedrock Multi-Agent Collaboration to synchronize reasoning logic across a diverse LLM swarm
- Engineered and deployed a React interface via Amplify to manage real-time configuration of the agent triad core
- Linked front-end to Lambda and DynamoDB to deliver seamless real-time chat streaming and session persistence

SnapRec | *React, Typescript, Tailwind, Figma* — November 2025

- Won 1st Place Grand Prize at the UCI ICSSC WebJam 2025 Hackathon
- Co-developed a full-stack recommendation assistant utilizing Gemini 2.5 Flash to deliver AI-researched suggestions
- Defined a mobile-first design system in Figma, simplifying development by ensuring UI and branding consistency
- Implemented a responsive UI layer by mapping Figma layouts to React components styled with Tailwind CSS
- Utilized React Router for structured client-side navigation and TanStack Query for asynchronous API calls

Jotstack | *HTML, Javascript, CSS, AWS Lambda, AWS Amplify, AWS Bedrock, Python* — May 2025

- Track Winner for the AI@UCI AWS CloudHacks 2025 Hackathon
- Developed a full-stack AI-powered interactive whiteboarding application deployed via AWS Amplify
- Integrated Anthropic Claude 3.5 Haiku via AWS Bedrock to generate sticky note suggestions based on user input
- Engineered a serverless RESTful API backend using AWS Lambda and AWS API Gateway for quick turnaround

ARrive | *Figma* — April 2025

- Created a design prototype for an augmented reality navigation service
- Utilized multiple stages of iteration through constructing wireframes and mockups
- Applied competitive analysis to guide UI design decisions
- Analyzed possible user flows to optimize user experiences and usability

Technical Skills

Languages: Python, TypeScript, JavaScript (ES6+), HTML5, CSS3
Frameworks & Libraries: React, Tailwind CSS, TanStack Query, React Router, DaisyUI, OpenCV, Ultralytics
Tools & Cloud: Git, Figma, Vite, VS Code, AWS (Lambda, Amplify, Bedrock, API Gateway)
Concepts: RESTful APIs, UI/UX Design, Responsive Web Design, Mobile-First Development, Agile Methodologies

Experience

College Tutor — August 2024 – Present
Garden Grove Unified School District — *Garden Grove, CA*

- Assisted students with grasping core concepts in Algebra/Trigonometry/Precalculus/AP Statistics
- Encouraged students to engage in collaborative learning through facilitating student-led discussions and inquiry
- Supported students in maintaining college eligibility through providing guidance in rigorous coursework
