Timmy Phan

timmyp3@uci.edu | linkedin.com/in/timmy-p | github.com/realtimml | timml.net

Education

University of California, Irvine — Irvine, CA
Bachelor of Science in Computer Science (GPA: 3.499) — *September 2024 – June 2028*

Experience

College Tutor — August 2024 – Present
Garden Grove Unified School District — *Garden Grove, CA*

- Instructed 50+ students in advanced STEM curricula, adapting pedagogy to accelerate individual learning
- Reshaped learning environments by empowering student-led collaborative inquiry and peer-to-peer problem solving
- Liaised with faculty and staff to monitor student progress, ensuring continuous academic milestone mastery

Projects

J.I.T. | *Swift, Figma, React, Typescript* — April 2026

- Best Use of MongoDB Atlas Track Winner for LA Hacks 2026
- Built an AR ed-tech mobile app leveraging edge LLMs and RAG to deliver real-time, textbook-grounded study aid
- Rapidly iterated through multiple design stages within a 36-hour window with Figma mockups and wireframes
- Worked with the ZETIC Swift SDK and ZETIC Melange to run Qwen3 0.5B on-device for instantaneous inference
- Integrated full-stack REST endpoints across FastAPI and Redis to orchestrate low-latency retrieval pipelines

MAGI | *TypeScript, React, Node.js, AWS Bedrock Agent Stack, Lambda, DynamoDB* — April 2026

- Architected an autonomous multi-agent stack on AWS Bedrock to streamline complex prompt orchestration
- Orchestrated AWS Bedrock Multi-Agent Collaboration to synchronize reasoning logic across a diverse LLM swarm
- Built and deployed a full-stack React interface to configure mission-critical agent workflows and state persistence
- Integrated frontend clients with serverless Lambda APIs and DynamoDB for real-time data streaming pipelines

Orbital | *React, Typescript, Tailwind, Figma* — January 2026

- Architected full-stack workflows for an autonomous AI-agent productivity suite integrated with Slack and Gmail
- Rapidly designed a high-fidelity Figma prototype in under 2 hours, streamlining development for the project team
- Engineered pagination and functional Chatbot/Task View interfaces using React to deliver MVP functionality
- Collaborated with project team to architect and implement RESTful API integrations for full-stack connectivity

SnapRec | *React, Typescript, Tailwind, Figma* — November 2025

- 1st Place Grand Prize Winner for the UCI ICSSC WebJam 2025 Hackathon
- Co-developed a full-stack recommendation assistant utilizing Gemini 2.5 Flash to deliver AI-researched suggestions
- Defined a mobile-first design system in Figma, simplifying development by ensuring UI and branding consistency
- Implemented a responsive UI layer by mapping Figma layouts to React components styled with Tailwind CSS
- Engineered high-performance client state via TanStack Query and enforced strict TypeScript typing standards

Jotstack | *HTML, Javascript, CSS, AWS Lambda, AWS Amplify, AWS Bedrock, Python* — May 2025

- Track Winner for the AI@UCI AWS CloudHacks 2025 Hackathon
- Developed a full-stack AI-powered interactive whiteboarding application deployed via AWS Amplify
- Integrated Anthropic Claude 3.5 Haiku via AWS Bedrock to generate sticky note suggestions based on user input
- Engineered a serverless RESTful API backend using AWS Lambda and AWS API Gateway for quick turnaround

Technical Skills

Languages: TypeScript, JavaScript (ES6+), Python, SQL, HTML5, CSS3
Frameworks & Libraries: React, Tailwind CSS, TanStack Query, React Router, DaisyUI, OpenCV, Ultralytics
Tools & Cloud: Git, Figma, Vite, VS Code, AWS (Lambda, Amplify, Bedrock, API Gateway)
Concepts: Full Stack Architecture, Code Reviews, REST APIs, UI/UX Design, CI/CD
